

CYBERPOL Strategic Framework 2016- 2025

**CONNECTING CYBER
ENFORCEMENT FOR A
SAFER WEB**

CYBERPOL BY ROYAL DECREE

WL 22/16.595

www.cyberpol.info

Vision and Mission

Our vision – what CYBERPOL aspires to achieve

"Connecting Cyber Authorities and Enforcement for a Safer Web"

Our vision is that of a digital cyber world where each and every authority, cyber law enforcement and cyber risk management professional will be able, through CYBERPOL established by Royal Decree, to educate, develop, integrate securely and share vital cyber risk information whenever and wherever needed, ensuring the safety of the global internet users of the cyber world of tomorrow. We constantly educate, inform and promote innovative and "Turn-Key" solutions that enable the cyber enforcement and mitigation in facing the challenges of the cyber world of today.

Our mission – what CYBERPOL does to achieve its vision

"Education and awareness in preventing and fighting ICC (International Cyber Crimes through enhanced mutual aid and innovation on cyber enforcement and mitigation matters"

Art. 2 of the CYBERPOL Approve Statutes states that: CYBERPOL's Mission is to facilitate the widest possible mutual assistance between all cyber criminal law enforcement authorities to ensure that cyber policing and risk management services can communicate swiftly, accurately and above all educate each other around the globe in the risk management and mitigation of cyber threats. We facilitate international access to cyber crime data and information allowing law-enforcement a greater perspective of the challenges they face. At CYBERPOL we provide international operational support on specific priority offense areas. We foster continuous improvement in the capacity of cyber enforcement to prevent and fight international cyber crime, the key development of knowledge, skills and competency necessary for effective worldwide cyber enforcement. Innovative pragmatic solutions our priority at all times, in the areas of global cyber enforcement and security matters in the fight against cyber threats and International cyber crime. Our mission is to enable and assist modern cyber enforcement training and education programs around the world to work together to make *"The World Wide Web a Safer Place"*

CYBERPOL's Prime Directives

Promote best practices in the areas of training and legislation development and implementation. Promote common standards, code of ethics, and good governance within the international cyber-mitigation and cyber management communities. Proactive in establishing applicable and reliable data sharing systems in formats customized to meet broad international cyber enforcement requirements. Establish forums to share knowledge and information globally, in order to support and enhance CYBERPOL members' abilities to detect, document, and deter identified international internet related threats & crimes.

CYBERPOL Strategic Framework 2016-2017

Strategic priorities

1. International Alliance

Establish and develop international strategic framework in the cyber enforcement network appropriate alignments, educational programs, partnerships for future global integration on cyber mitigation and risk management in order to share, educate and bring up to date all cyber enforcement professionals around the globe in the matter of cyber security risk management (SRM) as soon as possible.

2. Membership Support

Gain as many possible memberships from both law-enforcement community in public and private sector capable of enhancing, developing and promoting CYBERPOL mission and vision with expanding its educational program such as the *CyberBoK v1* to bring about a universal standardization in methodology related to Cyber Risk Management.

3. Innovation, Capacity Building & Research

Develop pragmatic solutions within the shortest timeframe available; safely secure the quarantine of the growing cyber threats around the globe that could lead to day "0" in the very near future.

CYBERPOL is committed to enhancing the cyber tools and digital services provided by us in the arena of cyber enforcement preparation by constantly striving to achieve the growth of international standards in cyber policing and security infrastructures. We remain committed to delivering high-level guidance and technical assistance, leveraging all enforcement expertise and resources.

CYBERPOL will develop certification, accreditation and cyber risk management standards on cyber policing and global cyber security matters, and support law enforcement in addressing new forms of cyber crimes by providing cyber training and digital forensic assistance. In addition, we will seek to increase partnerships, research and innovation on cyber defense and give increased focus to capacity building efforts in post-conflict and/or cyber risk areas.

4. Data development program provides round-the-clock support.

CYBERPOL will provide its first International Cyber Risk management tool via its *CyberWatch* international cyber crime database program for international border control, enforcement agencies and corporations. We will promote the most effective data sharing platform to effectively combat cyber risk to mitigate offenses and threats with a Digital intervention within the rule of international law.

5. Assisting in the identification of cyber crimes and cyber criminals

We are committed to monitor the World Wide Web for tracking of malevolent websites and IP's containing illegal and harmful content capable of affecting the physical, emotional and psychological well-being of all Internet users. We identify and research International Cyber Crimes (ICC), cyber-threats and global cyber-crime trends in the contemporary cyber world of today. "**CYBER WATCHDOG**" will alert, inform and assist global cyber enforcement sectors in both the public and corporate domain.

6. Corporate priorities

To ensure organizational health and stability we will foster, strengthen international relations in providing our products and services. The first **Turn-Key** solution "**CYBERWATCH**" by CYBERPOL will be implemented during the year 2016. We are committed to improve our human resources in order to best attract and retain talent while promoting diversity at all times. As part of CYBERPOL's monetary funding model, we will continue to associate with relevant partners – whether private or public – while ensuring safeguards are in place for the Organization to preserve both its transparency and independence to the community of the public as an international Utility not for profit covered under the Treaty 124 of International Organizations of the Council of Europe.

7. Consolidate Institutional Framework

The importance of efficient governance mechanisms are fully recognized by CYBERPOL in the need to develop geographical outreach programs to find innovative solutions to complement CYBERPOL's funding. We are committed in raising CYBERPOL's public profile and awareness and will persist to focus efforts on enhancing the authorized consistency and groundwork for its international activities. The establishing of networks and cooperation with other international organizations is fundamental for CYBERPOL in the International Arena.
